CERAMIC TOILETS

We focus on our toilets both on function and comfort for our customers, keep innovating and upgrading our product experience to obtain excellent brand reputation from our customers all over the world.

Easy Assembly & Disassembly Cover

The cover adopts the technology of easy assembly & disassembly. It ensures the easy cleaning of the cover and nowhere for the dirt to hide.

Upgraded Cover

The material of the cover has been upgraded. The cover's compressive strength is greatly enhanced. It is tough and durable. The colour looks like ceramic and it feels smooth. It is not easy for aging and fading.

Crystal Glaze

Crystal glaze is used with the new nano technology, and the firing temperature is strictly controlled over 1280 degree, which ensures the surface is greatly smooth, and no hidden, hard-to-reach places where bacteria can build up and odor can develop. Toilet is much easier to clean.

- 10% of normal cleaning time*
- 10% of normal detergent*
- 10% of normal water*

Antibacterial, Easy to Clean, Healthy
Scientific glaze formula ensures that the surface is hygienic and antibacterial.

TECHNICAL DETAILS

Responsible Water Use

Easy-cleaning Glazing

The glazing is carried out by high firing temperature so that the surface is smooth and easy to clean. The product always looks new even after long time using. There is no hard-to-reach places where bacteria can build up and odor can develop. Long-term cleanliness brings high-quality life experience.

Sewer Glazing

The inner surface of sewer is glazed so that the sewer is smooth and nowhere for dirt to hide, and no blocking any more.

Mute Slow-down Seat Cover

Mute slow-down seat cover technology can reduce the noise, collision and breakage of the seat cover when it is closed.

Comfortable And Healthy

Because of high humidity, bathroom is the suitable space for microorganism growth. We choose the environmental protection material which can effectively remove the odour in the air and be good at disinfecting to ensure the bathroom's cleanliness and the fresh air. So we can enjoy a healthy bathroom life.

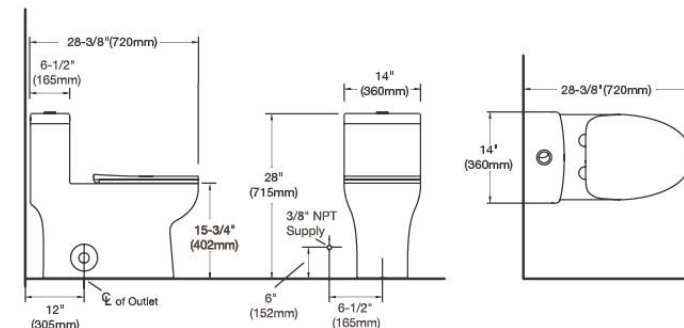

MODERN

Ceramic Toilet

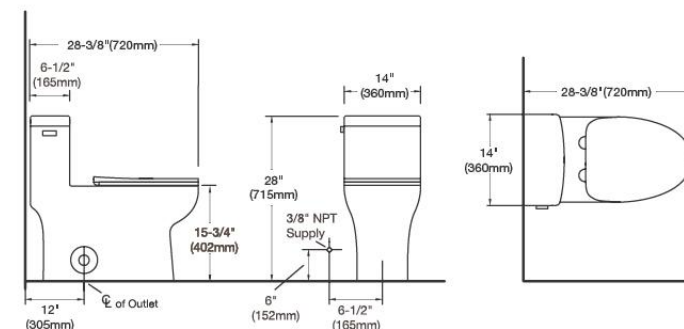

As a white classic with high -frequency mirrors in the bathroom, it is always comfortable, calm, atmospheric, calm, and quiet, maximizing the perfect balance anyway.

KITCHEN SINKS

The Minjie ceramic basin design is unique and exquisite.

It is fired at high temperatures,

The texture is hard and the glaze is bright.

Daily cleaning is more convenient.

THE MATERIALS

HEAVYWEIGHT GLAZE

The quality of the glaze and its application affects the durability of a sink. Minjie' unique heavyweight glaze is blended to exacting standards of strength and gloss, and is applied by a skilled specialist to ensure an even coating.

Two layers are applied to every Minjie sink to produce a smoother and hard-wearing glaze.

A Minjie sink is fired at 1200 °C for 32 hours to enable the heavy duty fireclay and glaze to fuse into one inseparable and enduring body.

BASIN PROCESS TEXTURE

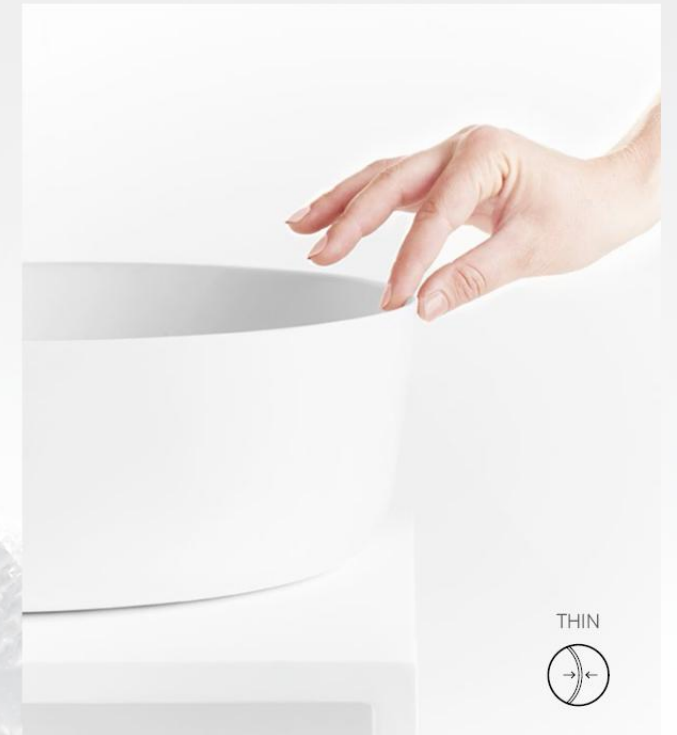

Water As The Bathroom Star

Water is the eternal master of bathroom. Here is the collision between water and ceramics and the combination of rigidity and flexibility. The water absorption on the basin surface is very low. It is beautiful as well as practical. An outstanding general aesthetic sense of space is created.

Minjie's distinctive Thin takes the firm's philosophy one step further by creating lighter visual finishes while renouncing neither their essence nor their characteristics.

The Thin washbasins have very refined edges, with a slimmer look, more typical of fine china than of a bathroom line. Thin is visual lightness that is translated into less weight and, in general, a sleeker bathroom.

Thin is a concept that touches on some of the pieces of the different collections, creating an exclusive and unique product.

Easy To Clean

The basin surface uses multi-layer glazing technology. It is clean and clear. Its high density makes it no peculiar smell. It is so dirt-proof, durable and no ponding that the bathroom can be tidy and easy to clean. Human-based design makes a peaceful life as a beautiful story.

High-Temperature Calcination

Continuous high-temperature calcination improves the quality of mud and make ceramic body tight. The water absorption rate of porcelain surface is very low, so the product is strong and not easy to crack. It can satisfy the needs of daily washing and provide you with better quality to let you enjoy it.

No Corners

Basing on the concise expression, it shows its soft feelings. Smooth grinding improves the sense of space, so that the design of each detail is just perfect without losing fashion and simplicity. The outline is elegant without dead corner so as to avoid collision and save space.

High Quality Materials

The raw material is well selected and pollution-free. The basin surface is not easy to leave scratches and spots after strict deployment. It is more healthy for washing. Inherit the spirit of craftsman, use concentration to interpret modern design and make it not only beautiful but also practical. Never stop moving for better experience.

Antibacterial

Multifunctional antibacterial technology, which is with obvious antibacterial effect, makes the basin surface not easy to produce odour and attract bacteria. There is no hidden danger to safety. Materials are seriously selected. Every detail is strictly treated. More cleanliness, more healthy.

No Impurity

Ultra smooth uniform surface, clear and transparent, bright and anti-yellowing. Remove all unnecessary details, effectively reduce dirt adhesion. Strict production standards ensure the quality and make the porcelain surface everlastingly new. It is safe for using.

YEARS

V e s s e l S i n k s

The production of folk art pots is like the annual rotation of the years. It is a circle and layer of glaze to record its growth process. After years of baptism, it leaves a beautiful and elegant art pot basin.

ARCTIC

Vessel Sinks

The art pots on the Nongjie Sanitary Arctic series are no longer limited to detail design, and they have made it generous and concise. Casuality and art can also be so practical to show the profound and profound ceramic craftsmanship.
