Las piezas de porcelánico llevadas a su máxima expresión. La gama Eco Luxe reúne todas las colecciones de materiales pulidos, incorporando también el acabado satinado, ideal para quienes buscan una estética elegante con un punto de suavidad visual. El acabado pulido, un esencial en el mundo de la cerámica, aporta un brillo sofisticado y atemporal, convirtiéndose en un detalle distintivo en la decoración de interiores. Por su parte, el satinado ofrece una alternativa más suave y contemporánea, perfecta para espacios que requieren calidez, naturalidad y distinción. Ambos acabados reflejan el compromiso con el diseño refinado y la versatilidad estética.

EN

Porcelain at its finest expression. The Eco Luxe range brings together all of polished collections, while also introducing the satin finish—ideal for those seeking an elegant aesthetic with a softer visual touch. The polished finish, a timeless essential in ceramic design, offers a sophisticated shine that adds a distinctive character to interior decor. In contrast, the satin finish provides a smoother, more contemporary look—perfect for spaces that call for warmth, natural beauty, and refined distinction. Both finishes embody commitment to refined design and aesthetic versatility.

ES

La resistencia que la naturaleza ha logrado desarrollar durante milenios, gracias a la tecnología, se consigue en cuestión de horas. Los materiales porcelánicos alcanzan una durabilidad comparable a la de la roca, gracias a la selección precisa de materias primas, el proceso de prensado y los ciclos térmicos a los que se somete. Como resultado final, un diseño refinado que adapta los patrones naturales a miles de gráficos, integrándolos perfectamente en nuestras colecciones de porcelánico.

EN

The resistance that nature has developed over millennia is achieved in just a few hours through technology. Porcelain materials offer the same durability as rock, thanks to the precise selection of raw materials, the pressing process, and the thermal cycles they undergo. The final result is an exquisite design that adapts natural patterns into thousands of graphics, seamlessly integrated into our porcelain collections.

El avance tecnológico y la investigación de nuestro departamento de I+D+i han permitido desarrollar una gama de porcelánicos con espesor reducido a 6.7-6.8 mm, manteniendo sus propiedades esenciales como resistencia, diseño y durabilidad. Esto ha logrado un ahorro del 30% en materias primas y energía, reduciendo las emisiones de CO2. El material es más flexible, facilitando su manejo y colocación, y su menor peso optimiza los costos de transporte. La tecnología de prensado avanzada y las materias primas optimizadas mejoran su resistencia, resultando en un material más compacto, ligero y duradero.

ES

Eco Red comprende los productos de pasta roja, elaborados a partir de arcillas rojizas que caracterizan esta tipología de material cerámico. Este tipo de cerámica es especialmente versátil, utilizándose comúnmente para revestimientos de pared, aunque su versión para pavimento no debe pasarse por alto. Gracias a su composición, Eco Red ofrece una estética cálida y natural, además de una excelente resistencia, lo que lo convierte en una opción ideal tanto para aplicaciones verticales como horizontales.

EN

Eco Red includes red-body products, made from reddish clays that define this type of ceramic material. This ceramic is especially versatile, commonly used for wall coverings, though its version for flooring should not be overlooked. Thanks to its composition, Eco Red offers a warm, natural aesthetic, along with excellent durability, making it an ideal choice for both vertical and horizontal applications.
